Course Description

The primary goal of this course is to facilitate your growth as both consumers and producers of research. We will explore a variety of methodologies (e.g., survey research/self-report, official stats/secondary data, quasi-experimental design, etc.) used in criminological and criminal justice research. Further, we will evaluate these methodologies within the context of design concerns such as: research purpose, operationalization, validity, reliability, and ethics.

Required Readings

Ronnet Bachman & Russell K. Schutt (2020). *Fundamentals of research in criminology and criminal justice* (5th Ed.). Sage (ISBN: 9781544374055).¹

Additional readings may be uploaded from time to time to our course page on Canvas.

Assignments

Exams

There will be three exams over the course of the semester, comprised of multiple choice and short-answer questions drawn from the assigned readings and class discussions. You will have the entire class session to complete each exam. Each exam is worth 25% of your final grade.

¹Note you may be able to obtain Version 3 or 4, or an electronic version, at lower cost.

Homework Assignments

There will be 5 [homework assignments](#) over the course of the semester. They will require you to seek out and read social science research and do some basic data analysis in [JASP](#), among other things. Any form of academic dishonesty is unacceptable. Instances of academic dishonesty will, at a minimum, result in a failing grade for that assignment, and a record of academic dishonesty will be placed in the student's academic file that is maintained by the School of Criminology and Criminal Justice. Instances of academic dishonesty may also be subject to disciplinary action by the University.
